Supporting Individuals with Opioid Use Disorder; A Nursing Perspective on Treatment within Hospital

Speaker: Deb Warren RN

Clinic nurse & manager at the Oxford Recovery Clinic.

Recovery coach & mentor with 20+yrs addiction/mental health experience
in both community and hospital treatment settings.

Objectives:

- learn/understand nursing interventions for people in early recovery
- learn how to assess and support individuals experiencing withdrawal from opiates
- learn specifics of Suboxone induction in hospital. How to assess and support patients initiating on Suboxone
- discharge planning - transitioning back to community and keys for success

Recognizing Opioid Use Disorder in Your Practice: Treatment and Programming Options

Speaker: Jody Elliot RN

Old South Family Health Team

Registered Nurse & program coordinator for primary care addiction treatment

Objectives

1. Recognize problematic opioid use in your practice and learn how to treat.
2. Learn how to make determinations as to who needs treatment.
3. Understand the details of initiating a patient and the nuances of dose adjustment.
4. Introduce Project Hope; a sustainable program designed for team based models.
5. Tips for talking to your patients.
