CFMHN Standards of Practice Member Survey

Welcome to the Canadian Federation of Mental Nurses (CFMHN) survey regarding the [Canadian Standards for Psychiatric-Mental Health Nursing 4th edition \(2014\)](#).

We are currently in the process of preparing revisions for the 5th edition. This survey was initially sent out in the fall of 2019, prior to the COVID-19 pandemic outbreak of March 2020, and the anti-racism movement of the summer of 2020. Therefore, we invite you to complete the survey again, if you completed it last fall; or complete it now for the first time. Our aim in resending the survey is that the impact and influences of these recent historical events on the mental health nursing care requirements of Canadians may be appropriately reflected in the 5th edition of the Standards of Practice.

The survey is completely voluntary and anonymous. Your name and any identifying information will not be collected. Your responses will be used at the aggregate level, along with the empirical and grey literature review, to inform the 5th edition of the standards of practice. If you wish acknowledgement of your participation, there will be a link at the end of this survey for you to click and receive a Certificate of Appreciation for Completion.

This survey will take approximately 30 minutes of your time. If you have any questions before, during, or after the survey, please contact: esantami@ryerson.ca

Thank you for completing the survey:
