

CFMHN 2021 Fall Conference

[View this email in your browser](#)

The Canadian Federation of Mental Health Nurses is thrilled to announce that our bi-annual conference will take place this coming October on an exciting virtual platform.

We know how hard you have all been working this past year and continue to do so. In recognition of this, the conference format will provide the greatest scheduling flexibility we can offer. We will provide the most relevant education and offerings.

The conference will run over the course of 2 weeks, with content of 1 to 3 hours each day. All content that we have permission to record will be available the day of the session and on-demand if you were unable to make it to the live presentation. That means that, unlike an in-person conference where you miss the content you can't attend, all registrants will be able to access recorded education at your own convenience post presentation and review multiple times if you wish.

In the virtual format, we are able to lower the cost of attendance with the elimination of food and audio-visual costs as well as the removal of travel expense. Venue costs are also lower for virtual vs physical space.

We are in the process of selecting and securing our speakers for the program. Stay tuned for the full agenda. We look forward to delivering a fantastic conference and are excited to have you attend!
