WEBINAR

Virtual Reality for Mental Health Education – Student, Clinician, and Patient Applications

August 19, 2021 @ 7- 8 pm ET

Dr. Don M Leidl RN BSN MN EdD
Assistant Professor, College of Nursing
University of Saskatchewan

This webinar will review the virtual reality technologies being utilized in mental health nursing education and discuss applications for nursing students, clinicians, and patients. The concepts of immersive learning and presence will be explored as they relate to the creation of virtual learning spaces that some argue are as good or better than the real thing.
